

Automated Manufacturing Systems Manager

The [Automated Manufacturing Systems Manager](#) will oversee the manufacturing processes of the newly expanded automated cabinet manufacturing equipment line at Decor Cabinets.

Join Our Mission:

To create cabinets people love, to bring light to the world & the community, to build life into people's lives, and to leave behind more than we take.

What We Do:

Decor is the unique result of passionate people, strong partnerships, and loyal customers. There's an unmistakable positivity and pursuit of excellence that makes our cabinets undeniably different. Our culture celebrates each member's individuality, providing opportunities for growth in skill, confidence, and character. We strive to meet the needs of those we serve, embrace change, and continually innovate the kitchen and bath industry.

Who We Are Looking For:

We're looking for a driven individual who will take ownership of optimizing production to deliver high-quality, cost-effective products while maintaining a safe and supportive work environment. The ideal candidate will bring a proactive approach to managing multiple priorities with a positive, solution-focused mindset. We're seeking someone who embodies the following characteristics and qualifications:

1) Leadership.

- Demonstrate company leadership values, creating a culture of learning and innovation in a supportive, collaborative environment.
- Work with Production Managers to ensure company goals are met.

2) Optimize Manufacturing Operations.

- Ensure the automated line meets production targets and lead R&D initiatives to boost productivity.
- Enhance workflow efficiency using system analysis.
- Work with technicians, engineering and maintenance to maximize uptime and availability of the line.

3) Ensure Adherence to Product Quality Standards.

- Decrease warranty claims, reduce product deficiency costs, and implement systems to enhance product quality.

4) Maintain Functional and Appropriate Equipment.

- Ensure compliance with preventative and predictive maintenance standards and SOPs, collaborating with engineering and maintenance to improve equipment OEE (overall equipment effectiveness).

5) Support and Uphold Safety and Health Initiatives.

- Conduct audits that help with safety improvements and ensure employees are well-trained in health and safety policy.

Competencies:

- Technical proficiency in Manufacturing Execution Systems, Office Suite applications, ERP Systems, etc.
- Strong problem-solving and troubleshooting skills.
- Business acumen with experience in budgeting, business cases, and ROI.
- Effective communication style, with strong written and verbal reporting/presentation skills.
- Results-focused with quick decision-making abilities in a fast-paced environment.
- Experience with Lean production principles is an asset.

Experience & Education Requirements:

- Degree in Engineering, Mechatronics, or equivalent.
- 5+ years of production management or senior supervisory experience in a manufacturing environment.

Location: Decor Cabinets—200, Route 100, Morden, MB
