

Project Engineer (Intermediate to Senior) *Associated Engineering*

Full-time permanent;
Location: Winnipeg, MB

About Us

At Associated Engineering, we are passionate about building communities that are vibrant and support economic growth. Sustainability is part of every project we undertake. That is why we have been a carbon neutral company since 2009.

We are a uniquely Canadian, employee-owned company that brings multi-disciplinary perspectives to our clients through our experience and technical involvement. We offer uncompromising service to public and private sector clients across Canada and abroad, providing a broad base of consulting engineering services in the infrastructure, water, transportation, environmental, building, energy, and asset management sectors. Recognizing our excellence and dedication to staff, we have been one of Canada's Best Managed Companies since 2008.

We know it takes dedicated, talented individuals working together to consistently deliver high-quality work and service to our clients. We achieve this by promoting collaboration, investing in our people, and fostering a culture that inspires our people to maximize their potential and think creatively while applying best practices. And we want you to join us!

Job Description

We currently have an opening for an **Intermediate to Senior Project Engineer** to join our team in **Winnipeg**. You will be responsible for the design and technical delivery of a wide variety of civil infrastructure projects. You will work with engineers, technologists, and support staff to provide engineering services to a variety of public and private sector clients. Your projects will focus on provincial, municipal, and community related water/wastewater infrastructure including water and wastewater treatment facilities.

You will be involved in preparing studies, designs, specifications, and contract documents. You will also participate in scheduling and tendering, construction inspection, and contract administration. You will also provide support to other members of our team and complete other duties as assigned while working on a variety of projects in a collaborative team environment.

As part of the Winnipeg Water team, you will contribute to and integrate with our high functioning team of Engineers, Technologists, and Project Administrators.

You will lead by example and apply new perspectives on technology use and the efficient application of technology. You are forward thinking and will engage fellow discipline members to improve overall team performance and client service.

You will primarily work on projects throughout Associated Engineering's Manitoba region, with the opportunity to work on projects throughout Canada.

Responsibilities will include:

- Preparation of proposals, design criteria, preliminary designs, detailed engineering design and specifications, and reports
- Technical guidance and mentoring of project team members including other engineers, and technical support staff
- Liaison with clients, government and regulatory authorities, and contractors
- Developing and enhancing client relationships and assisting with project management activities

Requirements

What you will bring:

- Undergraduate degree in Civil Engineering or an associated discipline from an accredited post-secondary institution
- 10+ years of relevant experience gained in a professional engineering setting
- P.Eng. in good standing with Engineers Geoscientists Manitoba
- Experience in the preparation of construction drawings, design calculations, cost estimates, and tender documents
- Experience in contract administration and construction inspection
- Experience in project management and project coordination
- Ability to write technical reports and proposals
- Strong analytical thinking and problem-solving skills
- Strong communication skills
- Ability to work within tight deadlines and schedules
- Possess a valid class 5 driver's license.
- Willingness and ability to travel as required

Everyone has their own unique talents, skills, and background. Even if you don't meet 100% of the qualifications outlined above, let us know why you'd be a great fit for this role!

What we offer:

- Competitive salary and benefits, including health coverage, dental coverage, use of our Employee and Family Assistance Program, and company pension program that matches your contributions.
- Flexible working arrangements, including flex time and remote working options
- Culture that promotes accessibility and respect, through our company-wide Diversity & Inclusion Committee, WISER (Women in Science & Engineering Retention) Committee, Accessibility Task Force, and other meaningful initiatives
- Culture that promotes sustainability, through our numerous local Eco-Action Committees, and company-wide Climate Change training
- Ongoing support for your professional development and personal growth through our Mentoring Program, Continuing Professional Development training hours, professional designation support, and Young Professionals Club

- Work environment that focuses on your health, safety, and overall wellness, including our local Wellness Clubs, and annual Fitness Allowance
- An active Social Club and other social and networking opportunities (including our biennial company-wide Olympics), Lunch-and-Learns, and community volunteer initiatives.
