

## Argus Industries is looking for an **Engineering Technologist/Designer**

Argus Metals Division is a team of skilled Tool & Die specialists, machinists and welders providing innovative custom designed tooling, systems and built-to-print projects. They have completed a wide variety of custom projects including plastic and rubber injection molds, plc controlled rotary weld fixtures, compression molding machines, and progressive and forming dies. Argus Metals is also responsible for supporting its parent and sister companies, Argus Industries and Terracab, with producing molds, fixtures and metal products.

Argus Industries is a leader in the industrial and aerospace markets manufacturing rubber-molded products and die-cut gasket seals. TerraCab is a cab manufacturing company located in Morden, MB that specializes in concept, design, ROPS certification and the manufacture of cabs for a wide spectrum of industrial and commercial equipment. For more information about Argus Industries and TerraCab, visit [www.argus.ca](http://www.argus.ca) and [www.terracab.ca](http://www.terracab.ca).

As an **Engineering Technologist/Designer** you will be focused on creation of cad models & drawings, quoting, material procurement, production planning, and production support. The work will require attention to detail and time management to ensure projects stay on track and that the data/information created and distributed is accurate.

### **In this role, you will:**

- Support production to complete projects (design, drawings, material, problem solving)
- Engage in identification and improvement of production and inventory systems
- Engage in Lean initiatives and continuous improvement activities
- ERP maintenance including stock codes, part number creation, customer and supplier data, and drawings

### **You are/have:**

- A graduate technologist/engineer
- Experience with 3D cad software(s) (Solidworks is an asset)
- Strong technical skills and excellent communication abilities
- Basic measuring skills with inspection devices (calipers, micrometers, etc.)
- Organized and results-driven with great problem-solving skills

**We provide a benefit package, pension plan, and a summer-hours program.**

If you want to work with a great group of people in a dynamic company, please submit your resume to [jeff@argus.ca](mailto:jeff@argus.ca). Please note that Argus Industries and TerraCab are committed to the principles of employment equity. Only selected candidates will be contacted.
